Quality portable fresh air breathing systems.

Solid Construction. Solid Investment.

Bolair Mobile Spray Rigs. Built Tough for Foam and Coatings Applications.

Designed for spraying. Built to last.

Bolair offers a full line of mobile spray rigs, all built and equipped for the task at hand, and backed by warranty.

Why buy from Bolair?

- Bolair trailer and truck builds have been engineered for proper weight distribution
- Bolair trailers are equipped with the properly rated axles and I- beams to handle the load
- Bolair rigs are insulated for harsh northern environments with efficient space heat options
- All electrical equipment and components are installed by our qualified personnel observing industry standard safety measures
- Bolair trailers have hose hatches that securely lock to keep warm air in and cold out
- Bolair rigs come with the necessary safety equipment to keep operators safe
- All equipment is properly secured with through- bolts to ensure everything stays in its place
- Bolair trailers are backed by a 3 year limited warranty and Graco equipment by either a 1 or 3 year warranty
- For warm weather climates and summer we offer air conditioning to keep B material from off- gassing
- Bolair's relationship with our customers does not stop once the rig is built and delivered, it continues on with the best and most comprehensive training, technical and customer service support possible.
- Bolair was founded in 1982 and we have always focused on two component coatings and foam applications "We have the experience!"

Fully equipped and qualified service technicians in all 4 of our locations. In our shops or on the road at your location, we are here to support you.

All the necessary inventory (and more!) to keep you running and minimize any downtime. Bolair understands that when you are not operating, you are not making money!

Bolair has you covered with inventory, technical service and customer service across our four Canadian locations.

Being properly trained on your rig and equipment is as equally important as the quality we put into our builds. Bolair includes equipment training by our qualified and experienced team with every rig purchase.

BOLAIR

Mobile Spray Rig

ABOUT BOLAIR

In business since 1982, Bolair has focused on two component coatings and foam equipment. Our first Mobile Spray Rig was built in 2002 and was a 20 ft Custom Trailer equipped for pipeline epoxy coatings. Since that first trailer, we have built hundreds of rigs for spray foam insulation and various coatings applications.

Bolair rigs are running successfully all over North America. When a customer purchases a Bolair Mobile Spray Rig, it starts a relationship that we treat at the highest level of priority from the initial sale to the training and the after-sale support and service. Our goal is to help our customers grow their business. We have a full service department in Milton (Ontario), Edmonton (Alberta), Maple Ridge (British Columbia) and a mobile service technician in Moncton (New Brunswick). We also have the full capability to travel to our customers when the need arises.
